Dear attendee,

AET are partnering up with Premium Lithium who are a major UK supplier of battery Electrical energy storage systems, Invertors and Solar panels.

They will be offering exclusive rates to purchase their product based on you having training and knowledge on the installation of their product.

If you have already attended a BPEC Solar & EESS course with AET, we will be arranging a free of charge additional a 1 day training course to provide all the required training needed to install Premium Lithium EESS battery and inverter systems.

After you have completed the 1 day training course, Premium lithium will offer you the following:

- Certification: Confirming you have carried our training on their product.
- Joining pack: Confirming you have access to their exclusive discounted price list to the products. (Please find enclosed)
- You will be offered a rebate of up to £1000 if you install 5 or more of Premium Lithium product packages (Terms and conditions apply). This is subject to you attending a verified Solar and Battery training course through AET

More detailed information will be provided once contact has been made by Premium Lithium.

- Support helpline on installation.

If you are interested in Premium Lithium contacting you to discuss more information about joining their exclusive product membership, please complete the attached GDPR form and AET will pass your details on.

Please note: Your information will be passed on to Premium Lithium once you have attended the 1 day training course.

Thank You
