

Premium Partners

Introduction

Firstly, thank for you considering partnering with Premium Lithium. Our objective is simple: to create a platform that facilitates and supports the uptake of renewable energy solutions to assist the UK in achieving net zero.

We understand you're likely incredibly busy, so we have kept this document as short as possible while ensuring you have the essential information you need to work as one of our partners.

Don't forget, Premium Lithium and myself personally are here to help support and grow your business, so please do feel free to reach out to us.

Rodney Hall

Business Development Manager

Why Partner with Premium Lithium?

Premium Lithium are on the way to becoming the UK's first and only renewable energy platform to assist and support you in growing your renewable energy business.

1. Perfect 5-Star Reviews

Premium Lithium's 100% 5-star reviews on Trustpilot reflect our dedication to perfection and customer experience. As an exclusive installer partner with Premium Lithium, you'll also benefit from the same 5-star service, ensuring you are supported in your business growth by a company with a perfect track record.

2. Exceptional Brand

Premium Lithium has an exceptional brand and reputation already. We have been featured on Classic FM, LBC Radio as well as in the National Trust. Customers come to us because they trust our brand and ability to support them on their renewable journey. By partnering with Premium Lithium, you are working with one of the fastest growing and most respected renewable companies in the industry.

3. Complete One-Stop Supplier of Premium Hardware and Equipment for You

Our Smart Batteries have best-in-class specifications and grade-A lithium cells, whilst also being modular and scalable. We currently have stock in our UK warehouse ready to fulfil your installation requirements. We can also supply you with solar panels, EV chargers and inverters too!

4. Generous trade pricing providing excellent profit margins to you

We manufacture / purchase at scale to offer you the best product at the best price, ensuring high customer satisfaction levels and good profit margins for you too.

5. Unlimited Support

From installation guides, knowledge bases and 'EVIE' our AI chatbot, you'll always have the right tools on hand for support. Need the human touch? Our Installation Managers have decades of experience and are always available by chat, email, or phone. In-person support can also be made available.

Price List

Please see below pricing. All prices are in £ and ex-VAT.

Other Products and Services Available

As a platform, Premium Lithium can offer you additional products and services to help grow and scale your business that are unavailable anywhere else. These include:

1. Lead Generation Service – With NO Upfront Cost

Want to generate more customers and leads? Tap into our massive marketing machine and brand and access postcode-specific leads from us without any financial risk or upfront cost from you. All you pay is a small marketing fee should the customer proceed to purchase.

2. Bespoke professionally built CRM

Convert 50% more leads into buyers with our advanced CRM and automations, available for free if you're signed up to our lead generation service.

3. Premium Survey Service

Use Premium Survey, the world's first remote survey service by Premium Lithium to outsource your site survey requirements and save time and manpower to focus on sales and installations.

4. Premium Lithium DNO service

Signed up for your Premium Survey Service? Then we can also assist you in providing a timely and efficient DNO application on your behalf, meaning you can spend more time closing deals and performing installations.

FAQs

Q1. Where can I find the datasheets of your hardware and equipment?

A1. For your convenience, the appropriate datasheets for our hardware and equipment can be downloaded by clicking the SKU link in the pricelist.

Q2. How long will the additional 20% promotion in addition to the 50% trade pricing be available for?

A2. This promotion is currently available for your first 10 orders with Premium Lithium.

Q3. Do you supply other products and equipment apart from Smart Batteries?

A3. Yes, we can also supply you with EV chargers, solar panels, inverters and installation kits. We also have 4 additional services in addition to hardware and equipment.

Q5. Is there free shipping and free installation kits available?

A5. Yes, all our orders come with FREE shipping and installation kits (normally retail for £250)

Q6. Can you ship hardware and equipment directly to customers' homes?

A6. For insurance and health and safety reasons we are only currently able to ship to installers' premises. Apart from larger solar panels, most of our hardware and equipment can fit in the backs of most vehicles.

Q7. I am interested in your services as well as your products, when can I take advantage of these?

A7. That's great news. Currently we are making all our services available to any partners purchasing hardware from us. Please do contact us to make your first order to access these other services.

Q8. I want to place an order, what do I do next?

A8. Please contact your Premium Lithium account manager using the details at the beginning.
